

FRESH FODDER SYSTEMS

365 DAYS OF FRESH GREEN

What are Green Savers Fresh Fodder Systems?

Green Savers Fresh Fodder Systems are hydroponic growing chambers that provides cheap and high quality fodder by sprouting different kind of cereal seeds.

Where can I use the Fresh Fodder Systems?

All Green Savers Fresh Fodder Systems are designed to be used in all fresh green grass consuming animal farms, including:

- Cattle Farms (dairy cattle, beef cattle, calves)
- Sheep Farms
- Goat Farms
- Poultry
- Zoo and Wild Life Nature reserves

I have a Livestock Farm. Why should I buy a Green Savers Fresh Fodder System?

- You can grow cheap, high quality and nutritious fresh fodder for your animals in your own farm daily
- It eliminates the need of large areas of land and you do not have to rent or buy wide land areas to feed your animals
- It eliminates the need of huge volumes of water to irrigate large areas of grass
- It reduces the labor costs to harvest and cut grass daily
- Grass produced from these systems produce fresh grass every day with no risk of insects or pests and no need for insecticides, so immune systems of your animals become more strengthened and healthy.
- You do not need large storage areas to stock your feed materials
- Increases your resistance to fluctuations in feed prices, since you can grow your own

What are the benefits of the Feed produced?

- High crude protein and metabolic energy
- Increases milk yield and weight gain
- Due to its high betacaroten rate, it strengthens the immune system and increases on fertility and conception rates.
- High digestibility.
- Active in natural enzymes, antioxidants, natural sugar and fiber.
- Increases the intake and utility of the other feeds those are given together in the diet.
- Low starch value.
- Vitamins, enzymes, antioxidants, biotin, free folic acid levels are higher than comparing other feeds.

GREEN SAVERS FRESH FODDER SYSTEM

Stable types starting from 60 Kg/day up to 2000 Kg/day.

EASY TO USE

- Lay the washed, cleaned and soaked seeds into the trays
- Load the trays into the system
- Sufficient light energy, constant climate conditions and disinfected irrigation water with enhanced oxygen capacity is provided when needed automatically
- At the end of the first 7 days, you can start feeding your livestock with naturally grown fresh green fodder.
- Wash & clean the empty trays and make them ready for reuse
- At the end of 7 days the cycle starts and you can start production everyday

SYSTEM SPECIFICATIONS

SI	Structure details	60kg/day	120kg/day	>=250kg/day
1	Outer wall <ul style="list-style-type: none"> • Insulated and durable outer surface 	Dimensions (lxwxh): 3'x9'x8'	Dimensions (lxwxh): 7'x8'x9'	As required
2	Shiny metal inner surface <ul style="list-style-type: none"> • Insulated from heat and radiation • Helps control internal atmosphere 	Same as outer wall	Same as outer wall	Same as outer wall
3	Air Conditioning system with AC control unit	1 ton	2 tons	As required
4	Hydroponic Fodder Trays	48	96	As required
5	Control Box for manual setup and calibration of the whole unit	One Unit	One Unit	One Unit
6	Submersible Water Pump	>=0.5 HP	>=1 HP	As needed
7	Doors and Windows of durable glass	As required	As required	As required
8	Pipes, Sprinklers, Hose and fittings	As required	As required	As required
9	Nutrient A Solution and Cleaning Solution	Enough for 6 months of harvest	Enough for 6 months of harvest	Enough for 6 months of harvest
10	LED lights	2 units	4 units	As required

THE GROWERS SUPPORT PROGRAM

Green Savers Hydroponics systems are designed and manufactured to be the best in the industry. The equipment purchase, however, is only a first step in setting up a successful hydroponics business. That is why all your hydroponics systems come with our **Growers Support** Program, a specialized service and support program aimed at giving you the information you need.

Our support covers installation assistance of the hydroponic system and includes advice/recommendations related to seed selection, propagation techniques, crop turn strategy, nutrient analysis and supply and general problem resolution. Our goal is to maximize crop production at every stage and assist growers in becoming competent and successful in their growing operation. Extra charges will apply for site visit, travel, custom parts, new materials and new/additional systems.

All support will be provided through email, SMS and/or our hotline.
